Report

In recognition of the need for enhancing the research orientation in undergraduate students the Scientific Committee had organized a training workshop on “**ICMR-STS (Indian Council of Medical Research – Short Term Studentship) Orientation Program**” on 24th November 2018 in Lecture Hall-1, Adichunchanagiri Institute of Medical Sciences, B G Nagara. The undergraduate students of 1 year and 2nd year MBBS attended this workshop.

Introduction: Undergraduate students generally do not have orientation towards medical research. To orient undergraduate students towards research methodology Indian Council of Medical Research has been conducting Short-Term Studentship projects since many years. Hence the workshop was organized to orient the undergraduate students towards starting projects works as per ICMR guidelines.

The workshop started at 10:00 AM with the welcome address by Dr. Raghavendra S K, Assistant Professor, Community Medicine. Dr. Aliya Nusrath, Professor & Head, Biochemistry delivered the talk covering the salient aspects of the ICMR-STS projects as much required for the undergraduate students. The students were also given activities to perform related the topic. Dr. Vinay S Bhat, Scientific Committee Coordinator felicitated the resource person with token of gratitude. The program ended with the ‘Vote of Thanks’ by Dr. Raghavendra S K & the photo session.

Dr. Raghavendra S K , Assistant professor in department of community medicine delivered welcome speech and opened the meeting by introducing the workshop background and objective

Report

The Internship Orientation Program was organized by the Medical Education Unit, AIMS for the 2014-15 MBBS batch on 6th and 7th February 2019 at Lecture Hall-1, AIMS.

On first day (06.02.2019), the inauguration of the program was done by the Principal, Dr. MG Shivaramu and the MEU Coordinator, Dr. Madhav K Savkar.

The program began with the welcome address by Dr. Madhav K Savkar and the invocation song by 1st year MBBS students Sanjana Srinivas and Shravya.

The first talk of the orientation program was on the topic "Ethics and Professionalism" by Dr. Amita, Professor, Pathology, AIMS where the principles of medical ethics with examples of case scenarios were discussed with the students. This was followed by the presentation by Dr. Vinay H R, Assistant Professor, Psychiatry, AIMS on "Communication Skills". The highlights of the talk were the types of communication, the attitudes of a physician towards patients and relatives and special scenarios. Dr. Vinaya M, Associate Professor, Pharmacology, AIMS delivered a talk on "Rational drug prescribing". The need, steps of rational drug prescribing, the advantages and disadvantages of rational and irrational drug prescribing were illustrated with examples.

The day 1 was concluded with the 'Vote of thanks'.

On Day 2 (07.02.2019), the talks were on guidelines for laboratory investigations by Dr. Asharani and Dr. Vijaya S. Dr. Raghavendra S K, Assistant Professor, Community Medicine interacted with the students on "Biomedical Waste Management". Dr. Shashikiran, Professor, Community Medicine delivered a talk on 'Post-exposure prophylaxis'. This was followed by sensitization of the interns to 'maintenance of practical record'. The last talk of the forenoon session 2nd day IOP was on the topic 'safety in blood transfusion' by Dr. Abhishek MG, Professor, Pathology.

A workshop on 'Basic Life Support (BLS)' by Dr. Mahesh Mylarappa, Consultant emergency physician, Columbia Asia Hospital, Bengaluru was scheduled in the afternoon session. The basics of the resuscitation techniques in emergency conditions such as in cardiac arrest, choking, etc. were demonstrated with the practice sessions by the interns during the session.

The program was concluded by the vote of thanks and distribution of participation certificates to the delegates and the resource faculty.

IT EMPLOYABILITY BY TCS

Report

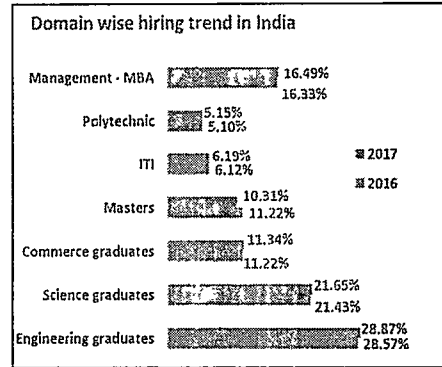

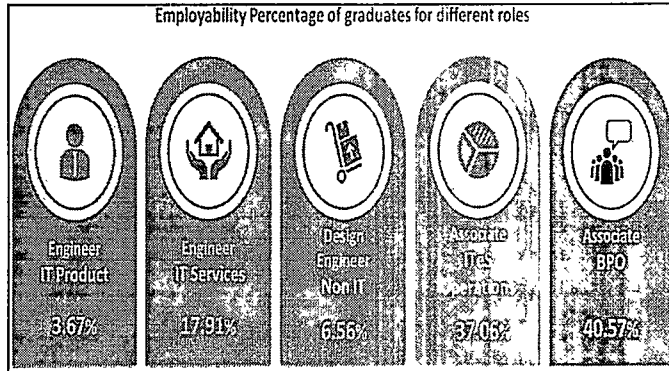

TCS and Corporate Social Responsibility

The guiding principle of Tata Consultancy Services (TCS)' Corporate Social Responsibility (CSR) programs is '**Impact through Empowerment**', where empowerment is a process of strengthening the future today, so that risks are minimized and certainty is experienced. TCS makes this happen using its IT core competence and active involvement of its employees and leadership team. The core areas of focus for TCS' CSR initiatives are education & skill development, health & wellness, environmental sustainability and support to the disadvantaged sections of society. One such program devised to enhance the employability skills of rural undergraduate students, promoting inclusive growth is **IT Employability**.

IT Employability - Social Context

While engineering contributes to 29% of total hiring in India, the employability of engineering students for technical and software role is less than 20%. In rural regions, the lack of English and Computer skills affect the employability prospects of capable students (More than 60% of undergraduates lack apt skills). Also, trained, multifunctional, and skilled youth from rural areas perceive their cultural identity as a weakness and need help to build the requisite confidence, courage and knowledge to work with employers in and outside of India. Most employers recruit students largely from reputed colleges as the skills gap between the urban/rural and top 100 and other college is more than 35 %, which means that students from rural regions do not get a platform to showcase their potential and gain a rightful place in the industry. Hence, it is essential to focus on improving the employability of rural students.

Program Implementation

The program for engineering students comprises of 192 hours weekend sessions along with

(Approved by AICTE, New Delhi, Recognised by Govt. of Karnataka)

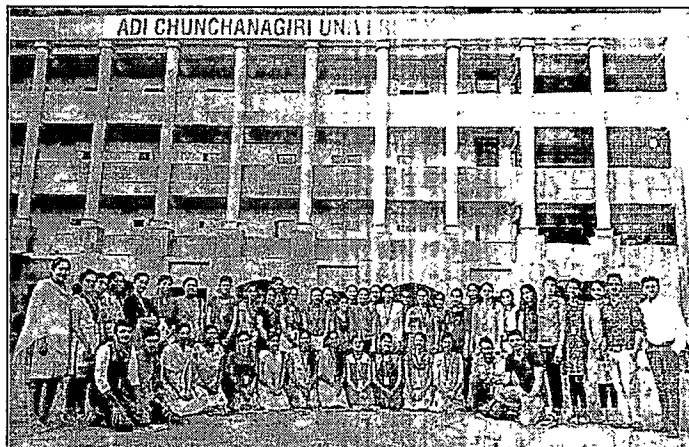

160 hours self-preparatory content executed in 24 days. There are 3 modules covering Business Skills, General Aptitude & Reasoning and Technical skills involving programming languages like C/C++/Java. This training starts during V semester and continues in a phased manner till VII semester.

The program for science students comprises of 160 hours weekend sessions along with 120 hours self-preparatory content executed in 20 days. There are 3 modules covering Business Skills, General Aptitude & Reasoning and domain skills like Assurance, IT IS and C programming. This training starts during IV semester and continues in a phased manner till V semester.

A key highlight of the program is that, it is completely volunteer driven by TCS associates visiting these colleges in remote pockets of India to conduct these sessions. Post training, all students are provided with an opportunity to attend TCS placement drive. Program follows a procedure manual for execution covering areas like deployment process, data management, feedback from partners/volunteers/students, evaluation of partners/students/volunteers, measurement of outcomes & impact measures, recognitions etc.

PGCET Training program

We have conducted department wise Training Program for competitive Exams and all aspiring students from various departments have actively participated in the training. The training program aimed to enhance their skills and knowledge, equipping them with the necessary tools to excel in competitive examinations. The participation suggests a positive response from the student community, indicating the value and relevance of the training for their academic and career pursuits. Overall, the department wise Training Program appears to be a successful and inclusive effort to support students in their preparation for competitive exams

TRAINING PROGRAM FOR COMPETITIVE EXAMS- PGCET

Report

Syllabus for PGCET 2018-2019

1. Engineering Mathematics:

Linear Algebra: Matrices and Determinants, Rank of matrix, Systems of linear equations, Eigen values and Eigen vectors.

Calculus: Limit, Continuity and Differentiability. Partial Derivatives, Test for convergence, Fourier series.

Vector Calculus: Gradient, Divergence and curl. Line, Surface and Volume integrals; Stokes theorem, Problems related to Gauss and green's theorems.

Differential Equations: Linear and Non-linear first order ODEs, Higher order linear ODEs with constant coefficients, Cauchy's and Euler's equations.

Partial Differential Equations: PDEs, formation of PDEs, solution of PDE by direct integration and separation of variables. Heat and wave equations.

Transforms: Laplace transforms, Fourier transform and Z-transform.

Probability and Statistics: Mean, Median, Mode and standard deviation; Random variables; Poisson normal and binomial distributions; Correlation and Regression analysis.

Numerical Methods: Solutions of linear and non-linear algebraic equations; Integration of trapezoidal and Simpson's rule; Numerical solutions of ordinary differential equations.

2. Electric Circuits and Fields:

Network Topology: Graph of Network, concept of tree, links, tie set schedule, cutset schedule. **Circuit Concepts:** Source transformation, circuit analysis using loop current and node voltage methods, star-delta conversion, dual networks and concept of controlled sources.

Network theorems: Thevenin's, Norton, Maximum power transfer, superposition and reciprocity, Resonant circuits, Transient analysis, Laplace transformations and applications, Standard test signals, Initial conditions.

Two-port Network: y and z Parameters and h -Parameters of two port networks.

Errors in Measurement- Types of errors and sources of errors.

Electric field- Coulomb's law and electric field intensity, Electric flux density

Analog and Digital Electronics:

Analog Electronics:

Diode Circuits, Rectifiers, Transistor biasing and bias stability, Class A, Class B & Class C Amplifiers, small signal h-parameter equivalent circuit of transistor. Expression for current gain, voltage gain, input impedance, RC coupled amplifier, frequency response, half power frequencies, bandwidth and factors influencing the bandwidth. RC Coupled emitter follower amplifier, current gain, voltage gain, input & output impedance, applications

FET-RC coupled Amplifier: Power Amplifiers: Class A, Class B, Push pull and Class C power amplifiers, Maximum power output, Driving power requirements.

Feedback Amplifiers & Oscillators: Concept of positive and negative feedback, advantages of negative feedback. Voltage & current feedback, effect of the same on performance characteristics. Condition for oscillation, Wein bridge oscillator, expression for frequency of oscillation, Crystal oscillators. Voltage regulator, operational amplifiers, comparator, ZCD, precision. rectifier, I to V & V to I converters, instrumentation amplifiers, square wave, triangular wave & saw tooth wave generator.

Wave shaping circuits: Clipping, Clamping, integrator & differentiator circuits.

Digital Electronics:

Number Systems & codes: Decimal, Binary, Octal, Hexadecimal, Binary coded decimal, Octal, Hex numbers, Excess 3 and Gray codes, Binary arithmetic.

Digital Circuits: Combinational Logic Circuits: Digital signals, Boolean constants and variables, Basic logic operations, AND, OR, NOR gates and realization or truth tables, Boolean

-expressions, Simplification of Boolean Expressions using basic theorems, Karnaugh map method of obtaining logic expressions, maxterm, mintenn. realization of logic functions using basic gates & also using NAND & NOR gates. Half adder, Full Adder, Multiplexers, Demultiplexers, Encoders & Decoders, A/D and D/A converters.

Sequential Logic: SR Latch, Clocked RS FF, D FF, JK & T FF, Master Slave JK-FF, Edge triggered flip-flops, Registers, Shift registers, Asynchronous counters, Synchronous counters. **Semiconductor Memories:** RAM, ROM, PROM, EPROM, EEPROM and Flash.

5. Control Systems:

Basic control system concepts, transfer function, Block Diagram reduction, signal flow graph. DC & AC servomotors & their TF. analogous systems F-V, F-I Analogies. Time

Stability: Absolute and relative stability, RH criterion. Polar plots, phase cross over & gain cross over frequencies. Bode plots, phase plot and gain plot, determination of gain

॥ ज्ञानं इत्येव ध्येयम् ॥

ADICHUNCHANAGIRI UNIVERSITY BGS INSTITUTE OF TECHNOLOGY

(Approved by AICTE, New Delhi; Recognised by Govt. of Karnataka)

Nyquist stability criterion: Principle of mapping of Nyquist path, gain margin, phase margin. Nyquist stability criterion. Root locus.

State space technique: state variables, state model of linear systems, solution of state equation, state transition matrix.

6. 8051 Microcontroller:

Microprocessor Vs Microcontroller, CPU Architectures-Von-Neumann, Harvard, CISC and RISC.

8051 Microcontroller: Architecture, Memory organization, Addressing modes, Instruction set.

8051 Programming: Assembly language programs, Time delay calculations and subroutines. 8051- Interrupts, Timers/Counters, Serial Communication.
8051 Memory Interfacing and I/O Interfacing.

7. VLSI Design and Embedded Systems:

Micro-electronics, MOS and Bi-CMOS circuit design, scaling, sub-system design and layout, testability, Embedded micro-controller, CISC & RISC architecture.

8. Signals and Systems. DSP:

Types of Signals and Systems, properties of systems, convolution, correlation, Fourier series and transforms (Discrete Time), Z-transform, DFT and FFT, windowing techniques, analog and digital filter design, IIR, FIR filter design, finite word length effect.

9. Analog and Digital Communication and Networking:

AM, FM, PM, digital communication – sampling, digital coding of analog wave forms, ISI, digital modulation techniques – PSK, BPSK, QPSK, MSK, spread spectrum. ISO / OSI model, TCP/IP model, internetworking.

10. Antennas and Micro Waves: Transmission lines, Characteristic impedance, impedance transformation, smith chart, impedance matching, Wave guides, modes in rectangular guides, boundary conditions, cutoff frequencies, dispersion relation.; Antennas: Dipole antennas, antenna arrays, radiation pattern, reciprocity theorem, antenna gain; Passive and active microwave devices, microwave measurement, Radar systems, Radio telemetry.

Power Electronics: Diodes, transistors, amplifiers, voltage regulators and power supplies, characteristics of DIAC, TRIAC, MOSFET, IGBT, Thyristors and its control circuits, control rectifiers, commutation techniques, AC voltage controller, DC choppers, close loop control of DC drives.
