PERSONALITY DEVELOPMENT WORKSHOP

The student support cell, ACN organized a workshop on “**Personality Development Programme**” for students on 7th November 2019. **Mr. Kashyap Trainer and Life coach**, was the resource person. The programme focused on the overall development of the participants through group activities and motivational sessions. The group activities filled high energy among students and made them mentally positive and emotionally enthusiastic. The SWOT analysis helps the students to realize and recognize their potential and drawbacks. Students were trained to take right decisions, solve the problem logically, take care of their relationships and cope with adverse situations around 59 students were actively participated.

“**Personality Development Programme**” on 7th November 2019. **Mr. Kashyap Trainer and Life coach**,

AVENUES AFTER B.COM GRADUATION

Date: 12-June-2019

Venue: BGSIT Seminar Hall.

Speaker: Mr. Kiran S, Assistant Professor

Mr. Kiran S, Assistant Professor addressed the first year B.Com students on soft skills. He started the session with a very creative introductory way, by introducing his Name, Place, Qualification and Occupation etc. Afterwards, he took the session into a different level by giving information regarding job opportunities available for B.com students in job markets. It was a well thought session of motivating the students to aspire themselves to become future Accountants, Managers and Directors.

STUDENT EMPOWERMENT AND EXCELLENCE DEVELOPMENT

To succeed in current challenging environment, there is a need for students to go beyond learning beyond books and take responsibility of shaping their own career.

SEED – Student Empowerment and Excellence Development helps students to approach their career in this light. It builds them specific mindsets and capabilities to design their career so that they remain valuable and continue to contribute no matter which job they get.

SEED meeting had conducted on 25-11-2019 at 4 PM at SAC College of Pharmacy in presence of Principals of all 6 constituent colleges and student's SEED coordinators. Panel had a discussion about upcoming seed events which was supposed to be held on every last Thursday of every month and also sensitized Adichunchanagiri University SEED Coordinators to get more inputs for future event.

Inviting Principal for the Program

First SEED event had conducted by SAC College of Pharmacy at Yuvalaya, SAC College of Pharmacy campus, BG Nagar, on 28-11-2019 in the presence of Principals of all six constituent colleges, Adichunchanagiri University and Students. RajanBellarpady, Chief Coordinator of SwachManas and SwachSoch, was invited as a resource person. His speech emphasized on 'Personality development'.

Report

ZESTECH always thrives at understanding Indian Industry requirement for every year and this puts us in the driving seat always when it comes to Learning and Development. Training module structure must be vivid and useful for the current trend, which can serve circumstance like real hiring. ZESTECH always strives in offering industry related module structure which caters to the need of current industry pattern in hiring. Consistent information standard and data form should be used in the learning system covering the national standards of recruitment. This model of preparing the module makes the independent data form into a concrete structure for training delivery.

Interface of industry trend and module structure is made simple by intensive research by the ZESTECH team of experts who function using a scientific structure and mechanism towards understanding the needs. Everywhere, system is simple to manipulate. However if the pattern of hiring and industry and global industry requirements changes, the Indian market gets into the mode of upgradation. And this is always visible in the module structure every year. Nowhere in the history of ZESTECH is the same content available for training delivery as well. Constant upgradation and learning towards the needs makes the structure of learning more prolific and helpful.

One evaluated research of the need, plays a major part in understanding the trend in the coming years as well. This helps ZESTECH to foresee the requirements and mend the learning content accordingly. Matching to the current technology trends, the evaluation of the learning also keeps transcending to the next level of excellence. All the more, these are the changes and challenges which keeps ZESTECH growing strong. ZESTECH's system of training module design is always Compatible, Expansible and flexible to meet the development of the training module and training itself.

System Structure

ZESTECH uses structure methods to develop the course content thereby developing students' ability in meeting the current demands. Structure means, the relation among comprising elements in the system, Structure method emphasizes the rationality of the module required for the current requirement and also puts forward some rules to increase rationality, such as resolvability of current challenge in getting hired, module independence and uniqueness. Such a structure of a learning system gives a clear idea of course arrangement and thereby delivering a world class training program.

Structure Management

To arrive at a structure, it takes a lot of effort to understand the gap in the campus to industry connect. Managing a structure for learning content for the current development of the students keeping in mind the future becomes a daunting task. The skill sets for the same profile and positions keep changing. Adaptability towards understanding the change becomes inevitable. Constant and consistent visit to the corporate sectors, made the task exciting and understood that learning towards employability enhancement is never ending and perpetual. The industry based skill development modules are developed, tried and tested through various means before getting it on the floor. ZESTECH follows a strong protocol in constant upgradation of course content with respect to hiring standards and the strong structure management techniques help us to meet the demands as mentioned above.

The module structure is an organized set of research, content making, realization, evaluation and gap management. It is a combination of corporate interaction and ZESTECH's team of experts' module design. The content design will not be visible to the untrained observer, however they always give a powerful outcome to the present and affect all dimensions of unskilled workforce.

PGCET Training program

We have conducted department wise Training Program for competitive Exams and all aspiring students from various departments have actively participated in the training. The training program aimed to enhance their skills and knowledge, equipping them with the necessary tools to excel in competitive examinations. The participation suggests a positive response from the student community, indicating the value and relevance of the training for their academic and career pursuits. Overall, the department wise Training Program appears to be a successful and inclusive effort to support students in their preparation for competitive exams.

TRAINING PROGRAM FOR COMPETITIVE EXAMS- PG CET

Report

Syllabus for PG CET 2019-2020

1. Engineering Mathematics:

Linear Algebra: Matrices and Determinants, Rank of matrix, Systems of linear equations, Eigen values and Eigen vectors.

Calculus: Limit, Continuity and Differentiability. Partial Derivatives, Test for convergence, Fourier series.

Vector Calculus: Gradient, Divergence and curl. Line, Surface and Volume integrals; Stokes theorem, Problems related to Gauss and green's theorems.

Differential Equations: Linear and Non-linear first order ODEs, Higher order linear ODEs with constant coefficients, Cauchy's and Euler's equations.

Partial Differential Equations: PDEs, formation of PDEs, solution of PDE by direct integration and separation of variables. Heat and wave equations.

Transforms: Laplace transforms, Fourier transform and Z-transform.

Probability and Statistics: Mean, Median, Mode and standard deviation; Random variables; Poisson normal and binomial distributions; Correlation and Regression analysis.

Numerical Methods: Solutions of linear and non-linear algebraic equations; Integration of trapezoidal and Simpson's rule; Numerical solutions of ordinary differential equations.

2. Electric Circuits and Fields:

Network Topology: Graph of Network, concept of tree, links, tie set schedule, cutset schedule. **Circuit Concepts:** Source transformation, circuit analysis using loop current and node voltage methods, star-delta conversion, dual networks and concept of controlled sources.

Network theorems: Thevenin's, Norton, Maximum power transfer, superposition and reciprocity, Resonant circuits, Transient analysis, Laplace transformations and applications, Standard test signals, Initial conditions.

Two-port Network: y and z Parameters and h-Parameters of two port networks.

Errors in Measurement- Types of errors and sources of errors.

Electric field- Coulomb's law and electric field intensity- Electric flux density

3. Analog and Digital Electronics:

Analog Electronics:

Diode Circuits, Rectifiers, Transistor biasing and bias stability, Class A, Class B & Class C Amplifiers, small signal h-parameter equivalent circuit of transistor. Expression for current gain, voltage gain, input impedance, RC coupled amplifier, frequency response, half power frequencies, bandwidth and factors influencing the bandwidth. RC Coupled emitter follower amplifier, current gain, voltage gain, input & output impedance, applications

FET-RC coupled Amplifier: Power Amplifiers: Class A, Class B, Push pull and Class C power amplifiers, Maximum power output, Driving power requirements.

Feedback Amplifiers & Oscillators: Concept of positive and negative feedback, advantages of negative feedback. Voltage & current feedback, effect of the same on performance characteristics. Condition for oscillation, Wein bridge oscillator, expression for frequency of oscillation, Crystal oscillators. Voltage regulator, operational amplifiers, comparator, ZCD, precision rectifier, I to V & V to I converters, instrumentation amplifiers, square wave, triangular wave & saw tooth wave generator.

Wave shaping circuits: Clipping, Clamping, integrator & differentiator circuits.

Digital Electronics:

Number Systems & codes: Decimal, Binary, Octal, Hexadecimal, Binary coded decimal, Octal, Hex numbers, Excess 3 and Gray codes, Binary arithmetic.

Digital Circuits: Combinational Logic Circuits: Digital signals, Boolean constants and variables, Basic logic operations, AND, OR, NOR gates and realization or truth tables, Boolean

-expressions, Simplification of Boolean Expressions using basic theorems, Karnaugh map method of obtaining logic expressions, maxterm, minterm realization of logic functions using basic gates & also using NAND & NOR gates. Half adder, Full Adder, Multiplexers, Demultiplexers, Encoders & Decoders, A/D and D/A converters.

Sequential Logic: SR Latch, Clocked RS FF, D FF, JK & T FF, Master Slave JK-FF, Edge triggered flip-flops, Registers, Shift registers, Asynchronous counters, Synchronous counters. **Semiconductor Memories:** RAM, ROM, PROM, EPROM, EEPROM and Flash.

(Approved by AICTE, New Delhi, Recognised by Govt. of Karnataka)

4. Control Systems:

Basic control system concepts, transfer function, Block Diagram reduction, signal flow graph, DC & AC servomotors & their TF, analogous systems F-V, F-I analogies, Time domain and frequency domain analysis.

Stability: Absolute and relative stability, RH criterion. Polar plots, phase cross over & gain cross over frequencies. Bode plots, phase plot and gain plot, determination of gain and phase margins.

॥ ज्ञाने इने ह्युपदेष्टे ॥

ADICHUNCHANAGIRI UNIVERSITY BGS INSTITUTE OF TECHNOLOGY

(Approved by AICTE, New Delhi;, Recognised by Govt. of Karnataka)

Nyquist stability criterion: Principle of mapping of Nyquist path, gain margin, phase margin. Nyquist stability criterion. Root locus.

State space technique: state variables, state model of linear systems, solution of state equation, state transition matrix.

5. 8051 Microcontroller:

Microprocessor Vs Microcontroller, CPU Architectures-Von-Neumann, Harvard, CISC and RISC.

8051 Microcontroller: Architecture, Memory organization, Addressing modes, Instruction set.

8051 Programming: Assembly language programs, Time delay calculations and subroutines. 8051- Interrupts, Timers/Counters, Serial Communication. 8051 Memory Interfacing and I/O Interfacing.

6. VLSI Design and Embedded Systems:

Micro-electronics, MOS and Bi-CMOS circuit design, scaling, sub-system design and layout, testability, Embedded micro-controller, CISC & RISC architecture.

7. Signals and Systems. DSP:

Types of Signals and Systems, properties of systems, convolution, correlation, Fourier series and transforms (Discrete Time), Z-transform, DFT and FFT, windowing techniques, analog and digital filter design, IIR, FIR filter design, finite word length effect.

8. Analog and Digital Communication and Networking:

AM, FM, PM, digital communication – sampling, digital coding of analog wave forms, ISI, digital modulation techniques – PSK, BPSK, QPSK, MSK, spread spectrum. ISO / OSI model, TCP/IP model, internetworking.

9. Antennas and Micro Waves: Transmission lines, Characteristic impedance, impedance transformation, smith chart, impedance matching, Wave guides, modes in rectangular guides, boundary conditions, cutoff frequencies, dispersion relation.; Antennas: Dipole antennas, antenna arrays, radiation pattern, reciprocity theorem, antenna gain; Passive and active microwave devices, microwave measurement, Radar systems, Radio telemetry.

Power Electronics: Diodes, transistors, amplifiers, voltage regulators and power supplies, characteristics of DIAC, TRIAC, MOSFET, IGBT, Thyristors and its control circuits, control rectifiers, commutation techniques, AC voltage controller, DC choppers, close loop control of DC drives.
